

ENERGY SAVINGS SPOTLIGHT

SOMEWHERE INN[™] CALABOGIE

About The Business

At Somewhere Inn, the mission is to inspire guests to get away, spend time in nature, and foster connections with the community around them. The location for Somewhere Inn was purposefully chosen to be surrounded by nature, as it has the power to restore and reset. This vision extends far beyond their guests and their experience; stays at Somewhere Inn do good for everyone, their community, and the planet. The EcoFund program opens up conversations amongst Somewhere Inn guests about their continued efforts to create a more sustainable future for the tourism industry and how to be part of positive and needed change.

Project Summary: *PTAC Unit Upgrade*

"We have been able to use the funds generated from the EcoFund since its inception, to replace and pay for (almost) in full 9 out of 11 of the PTAC units upgraded at the Somewhere Inn. We hope to finish the changeover by Spring 2024. The new units provide us with a more energy-efficient way to heat and cool the rooms, which is cutting down on our carbon footprint, and allowing us to reach our sustainability goals more quickly."

— *Meghan James, General Manager - Somewhere Inn Calabogie*

As a company, Somewhere Inn Calabogie has pledged to provide a superior guest experience, while ensuring they always take into account their current and future economic, social, and environmental impacts. They consistently respect the cultural authenticity of their host communities and conserve their cultural heritage and values, as well as providing their team with an effective, measurable, and sustainable management plan to achieve these goals.

About GreenStep EcoFund Verified:

The GreenStep EcoFund Verified program helps businesses generate a budget to implement energy efficiency and carbon reduction projects that drive down operating costs and showcase a commitment to sustainability. www.greenstep.ca
